

RIZKA ASMITA

Informatics Graduate | Software Developer | AI & Data Enthusiast

Samarinda, East Kalimantan | asmitarizka@gmail.com | +62 813 4633 1092 | linkedin.com/in/rizkaasmita/

PROFESSIONAL SUMMARY

Informatics graduate from Mulawarman University with hands-on experience in software development, machine learning, and AI integration through internships, teaching assistantship, and academic projects. Proficient in Laravel, JavaScript, Python, React, REST API development, SQL, and data analysis using Microsoft Excel. Proven track record delivering AI-powered applications, web-based Augmented Reality solutions, and data-driven systems from requirements analysis through deployment. Strong problem-solving, communication, and cross-functional collaboration skills, seeking a Software Developer / AI Engineer role to deliver reliable, scalable solutions.

WORK EXPERIENCE

Project Officer Intern

Jan 2026 – Jun 2026

Briton English Education, Samarinda

- Coordinated and executed organized activities effectively, ensuring alignment with project timelines and objectives.
- Managed project operational needs, including logistics and administrative requirements.
- Processed and compiled participant data using Google Sheets, Microsoft Excel & Word for administrative reporting.
- Supervised participants and ensured activities proceed according to procedures and schedules.

Backend Developer Intern

Jan 2025 – Mar 2025

STMIK Samarinda

- Participated in coordination and discussion meetings with STMIK management and stakeholders to define system requirements and validate admission process workflows.
- Built a new student registration system using Laravel, covering architectural design and implementation of core features.
- Designed and implemented a database structure tailored to system requirements, ensuring accurate and efficient data management.
- Demonstrated strong communication, teamwork, and time-management skills in a professional academic environment.

System Analyst Intern (URS & Requirement Analysis)

Jan 2025 – Feb 2025

Dinas Komunikasi dan Informatika Kota Samarinda

- Prepared User Requirement Specifications (URS) and conducted needs analysis for an Asset Management Information System within the municipal government.
- Coordinated and participated in technical meetings with department heads to discuss and validate system workflows.
- Prepared and documented Minutes of Meeting (MoM) during working visits to city-level government offices as formal reports.

Laboratory Teaching Assistant

Aug 2023 – Dec 2024

Mulawarman University, Samarinda (Part-time)

- Served as a Teaching Assistant for four undergraduate laboratory classes covering Programming Basics (Python), Web Development (HTML, CSS, JavaScript, PHP), and Database Systems (MySQL Workbench & Laragon).
- Guided students through practical exercises, debugging code, and implementation of programming concepts.
- Evaluated laboratory assignments and provided technical feedback, contributing 10% to the overall course grade.

EDUCATION

Bachelor of Informatics

Aug 2022 – May 2026

Mulawarman University, Samarinda

GPA 3.89/4.00

Kaltim Tuntas Scholarship Recipient (2023 – 2026)

Relevant Coursework: Database Systems, Machine Learning, Computer Vision, Software Development.

PROJECTS

Web-Based Markerless AR Virtual Try-On for Glasses (Undergraduate Thesis) [[Github](#) | [App](#)]

Apr 2026

Blender, MindAR, JavaScript, A-Frame, Three.js

- Developed a web-based markerless Augmented Reality application for virtual glasses try-on using MindAR, A-Frame, and Three.js.
- Implemented real-time face tracking to accurately place 3D glasses models.
- Designed, modeled, and textured 3D glasses assets in Blender, optimized for real-time web-based AR rendering.
- Conducted usability testing, achieving an overall satisfaction score of 88.43%.

AI-Powered Formative Assessment (Capstone Project – Asah led by Dicoding) [[Github](#)]

Nov 2025

React.js, Express.js, & LLM API

- Developed a REST API using Express.js integrating an LLM API to automatically generate questions from learning materials.
- Applied prompt engineering techniques to improve the quality and relevance of AI-generated questions.
- Designed JSON structures and backend parsers to process LLM outputs into standardized formats.
- Deployed backend on Render and frontend on Netlify.

Rainfall Intensity Classification Using the Mamdani Fuzzy Method [[Publication](#)]

May 2025

Python

- Performed data preprocessing and cleaning on weather datasets prior to modeling.
- Designed fuzzy rules and evaluated classification results.

Web-Based Student Registration System Development – STMIK Samarinda [[Github](#)]

Mar 2025

Laravel 11

- Designed and optimized the database structure for efficient data management.
- Developed the admin backend system to manage and monitor registration data.
- Implemented end-to-end student registration processes, ensuring a smooth and structured workflow.

Lung Cancer Classification Using Convolutional Neural Network (CNN) [[Github](#)]

Dec 2024

Python & Flutter

- Developed a mobile application interface using Flutter for image upload and prediction result display.
- Integrated AI model APIs into the mobile application to enable real-time prediction.

TECHNICAL SKILLS

- **Languages:** Bahasa Indonesia (Native), English (Intermediate | TOEFL Score: 520 [[Certificate](#)])
- **Programming Languages:** PHP, Python, JavaScript, SQL
- **Framework & Libraries:** Laravel, React.js, Express.js, Three.js, A-Frame, MindAR
- **Database:** MySQL, MySQL Workbench, Database Design & Architecture
- **AI / Machine Learning:** LLM API Integration, Convolutional Neural Network (CNN), Prompt Engineering, Fuzzy Logic, Support Vector Machine (SVM), K-Means, Random Forest
- **AR / 3D & Mobile:** Blender (3D Modelling), Flutter (Mobile Development), Unity
- **Tools & Platforms:** Git/GitHub, Render, Netlify, Figma, Postman, Canva, Blender, Google Sheets, Ms. Office, Laragon
- **Soft Skills:** Requirement Analysis, Stakeholder Coordination, Problem-Solving, Teamwork, Time Management, Technical Documentation
